Yardage given is for long gowns and robe illustrated on pattern front. Yardage includes fabric sleeve for View A gown. **To substitute wide eyelet trim for this gown sleeve, as shown on cover, will require 1 yd. wide trim.** Yardage required when substituting different sleeve lengths for gowns or robe can easily be figured by studying diagram and chart below.

“FABRIC ECONOMICS”

These yardage measurements are listed as a quick convenience for the consumer when purchasing fabric. If length desired for gown or robe is determined and is less than the lengths listed above, less fabric will be required. Taking time to carefully study the diagram and chart below to figure yardage can be money saving. Also note that more than 1 bias strip can be cut from 1 bias strip fabric section. Making more than one gown and/or robe of the same color would require only one section of fabric for the bias strips--resulting in less fabric to be purchased.
